Art Unit: 2155

### **DETAILED ACTION**

1. Claims 1 and 3-22 remain for further examination.

## The new grounds of rejection

2. Applicant's arguments with respect to claims 1 and 3-22 filed on January 14, 2008 have been fully considered but they are deemed to be moot in view of the new grounds of rejection.

### **Drawings**

3. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

## **NON-STATUTORY DOUBLE PATENTING**

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re* 

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

5. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application, See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

#### **OBVIOUSNESS-TYPE DOUBLE PATENTING**

- 6. Claims 1, 8, 14, and 20-22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 10 of U.S. Patent No. 7,353,262. Although the conflicting claims are not identical, they are not patentably distinct from each other because:
- 7. As to claims 1, 8, 14, and 20-22, the claims 1 and 10 of U.S. Patent No. 7,353,262 recited all claimed limitations of the instant application claims 1, 8, 14, and 20-22, and claimed local run time environmental condition including condition with a wildcard to determine the configuration settings for the client system, but did not claimed that the local run time environmental condition including condition based on a

Application/Control Number: 10/700,615 Page 4

Art Unit: 2155

client CPU is a mobile type, a PC card driver is started, a PC card is inserted in a socket, a system battery is present, a portable power scheme is selected in an operating system, and an uninterruptible power supply (UPS) is connected to determine the configuration settings for the client system.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the different conditions as stated above instate of using a wildcard to determine the configuration settings for the client system and the client system is a laptop in the method in a client-server environment to manage a configuration on a client system in the claims 1 and 10 of U.S. Patent No. 7,353,262 because it would have improved the transmission control and increased the utilization and efficiency of a mobile/portable/client unit by improving the transmission control.

#### **Claims Objections**

8. Claims 3-7, 9-13, and 15-19 are objected to as being dependent upon a rejected base claims, but would be allowable if rewritten in independent from including all of the limitations of the base claim and any intervening claims.

# **Contact Information**

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Bharat Barot** whose Telephone Number is **(571) 272-3979**. The examiner can normally be reached on Monday-Friday from 7:00 AM to 3:30 PM. Most facsimile-transmitted patent application related correspondence is required to be sent to the Central FAX Number **(571) 273-8300**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, <u>Saleh Najjar</u>, can be reached at (571) 272-4006.
